Introduccion

Dentro del ecosistema de WordPress, existen varios lugares donde dejar feedback, solicitar nuevas funciones e informar errores. A modo de introducción, repasemos dónde podemos dejar comentarios.

- Trac para core y meta
- GitHub para cada equipo o proyectos

#57948 new defect (bug)

Opened 12 months ago
Last modified 10 months ago

Media toolbar elements height /size is inconsistent across views

Reported by:	 oglekler	Owned by:	
Milestone:	Awaiting Review	Priority:	normal
Severity:	normal	Version:	
Component:	Media	Keywords:	has-screenshots needs-design-feedback has-patch
Focuses:	ui, css		

Description

When window.innerWidth is between 782px and 900px we have bigger height for selects the for all other toolbar elements, when window width is less than 782px button is becoming bigger but toggle view buttons are staying the same. I assume all element need to be resized accordingly and margins between adjusted as well.

 @oglekler 12 months ago

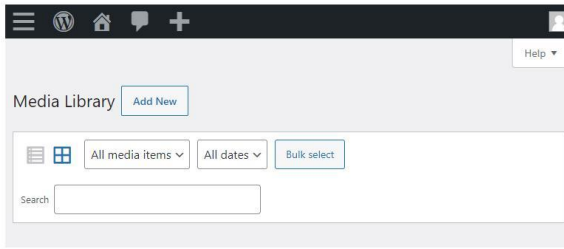

• Attachment [Media Toolbar views.png](#) added

The screenshot shows three instances of the WordPress Media Library interface. The top instance shows a standard view. The middle instance shows a view with a code overlay: `media-view-no-select { min-height: 40px; font-size: 16px; line-height: 1.429; padding: 10px 0px 0px 0px; }`. The bottom instance shows a view with a code overlay: `media-screen-and (max-width: 782px) wp-core-ui .button, wp-core-ui .button.button-large, wp-core-ui .button.button-small, wp-core-ui .button.button-link { padding: 0 5px; line-height: 2.7446377; font-size: 16px; vertical-align: middle; min-height: 40px; margin-bottom: 0px; }`

 @oglekler 12 months ago

• Attachment [Media Toolbar proposal.png](#) added

The screenshot shows the WordPress Media Library interface with a proposed toolbar design overlaid. The toolbar elements are more consistent in height and spacing across different screen sizes.

Making WordPress.org

Home About Core Team News Tickets Reporting Browse Source View Graphs Admin Support for authors Log out

Thanks for helping us make the WordPress.org sites better

Have a bug report for the WordPress.org site? We now have this Trac for that. View a list of open tickets, and create one.

What About Core Team? We used to manage the WordPress.org site on the same Trac as WordPress core is developed. Here is a list of open tickets left over. This is now the proper, canonical place for bug reports for the WordPress.org site.

Make the delete menu confirm dialogs consistent #59788

afercia opened this issue 2 days ago · 0 comments · May be fixed by #59825

afercia commented 2 days ago · edited · Member

Description

There's at least two confirm dialog shown when deleting a navigation menu-

- From the navigation lock inspector > Settings > Advanced > Delete menu
- From the editor navigation panel > Design > Navigation > (menu name) > Actions ellipsis button > Delete

Screenshots:

professional services caters to a diverse clientele,

These two confirm dialogs should look very similar but they have differences in terminology, heading name of the buttons. Under the hood they use different components but that's fine as long as the design and user experiences are as consistent as possible.

- The first one is an [inspector control](#) that uses a [Modal dialog](#).
- The second one is a [ConfirmDialog](#).

At the very least they should:

- Either both have a heading or omit it (better: make it visually hidden).
- Either both include the menu name in the heading or omit it.
- Either both have an X close button or omit it.
- Use the same casing for 'Navigation menu'.
- Use the same buttons height.
- Use the same name for the confirm action: generally WordPress doesn't use 'Confirm', it rather uses the more specific action name, in this case it should be 'Delete'.

Ideally, they should use the same component.

Step-by-step reproduction instructions

- Go to the site editor.
- Select a navigation block that does have a menu.
- In the Navigation block inspector, go to the Settings tab, scroll down to 'Advanced', expand it and click 'Delete menu'.
- Observe the confirmation dialog (actually a [Modal component](#)).
- Go to the navigation screen (Design > Navigation > (menu name) > Actions ellipsis button > Delete
- Observe the confirmation dialog (actually a [ConfirmDialog component](#)).

Screenshots, screen recording, code snippet

Cómo escribir un issue

- Título: poner el componente entre [] y luego el título
 - [HelpHub] [Themes Handbook] [Advanced Administration Handbook]

Cómo escribir un issue

- Rellenar la descripción

The screenshot shows the GitHub interface for creating a new issue in the 'WordPress / Documentation-Issue-Tracker' repository. The page title is 'Issue: Fix Doc Issue Report'. Below the title, there is a brief instruction: 'Report an issue in the existing WordPress documentation and help us improve the documentation. If this doesn't look right, choose a different type.' The main form is divided into two sections: 'Add a title' and 'Add a description'. The 'Add a description' section is currently active, showing a rich text editor with a 'Write' tab selected. The editor contains a template for writing an issue description, including instructions on how to format the title, URL, and section of the page. The 'Submit new issue' button is visible at the bottom right of the form. On the right side of the page, there are settings for assignees, labels, projects, milestones, and development, all currently set to 'None yet' or 'No one--assign yourself'. At the bottom of the page, there is a note: 'Remember, contributions to this repository should follow its contributing guidelines and code of conduct.'

Y esto es un issue

- Si tienes una cuenta en GitHub, la tienes que conectar con tu perfil en WordPress.org
- Para asignarte el artículo comenta con `/assign`

The screenshot shows a GitHub issue page for the repository 'WordPress / Documentation-Issue-Tracker'. The issue title is '[HelpHub] Block Themes link broken in Customizer doc #1475'. The issue is currently 'Open' and was created 2 weeks ago by user 'macmanx2'. The issue description includes the URL of the page with the issue, the section of the page, and a suggested fix to change the link to 'https://wordpress.org/documentation/article/block-themes/' and check 'Open in new tab' in the editor. The issue has been assigned to 'user documentation (HelpHub)' and has 2 participants. The page also shows a comment from 'github-actions' suggesting the use of 'em' labels and a comment from 'estelar1s' adding the 'user documentation (HelpHub)' label. At the bottom, there is a 'Add a comment' section with a text area and a 'Close issue' button.

Asignación y revisiones

- El usuario se puede asignar el ticket
- También se asignan durante las reuniones del equipo de documentación
- Triage – la semana dos del mes
- Online contributor day – la semana cuatro del mes (3 hrs)
- Todos los artículos son revisados dos veces para evitar errores
- Team handbooks revisan sus propios artículos
